

A dolphin is captured mid-leap, emerging from the surface of a deep blue ocean. The dolphin's body is sleek and dark, with a lighter patch visible on its side. Water droplets are frozen in the air around its tail and midsection, indicating the point of exit from the water. The background consists of a vast expanse of blue water with gentle ripples.

Dolphins

Kevin

Introduction

Have you ever wondered how a dolphin survives in warm climates? Dolphins have unique bodies to help them survive. Dolphins are carnivores.
